Portfolio: [rakibul-portfolio](https://www.rakibul-haque.com)

Career Objective

Detail-oriented Electrical and Electronics Engineering graduate with professional experience at North South University as a Research Assistant and Assistant Lab Officer. Experienced in data analysis, problem solving, and supporting operational activities in academic and technical environments. Skilled in analytical tools such as Excel, MATLAB, and Python, with hands-on experience managing laboratory operations, coordinating experiments, and assisting research projects. A strong team player with good organizational skills and attention to detail, able to learn new systems quickly and apply structured thinking to solve problems. Seeking a corporate role where analytical ability, adaptability, and operational support skills can contribute to organizational growth and efficiency.

Work Experience

Assistant Lab Officer (Part-Time)

July 2024 – Present

Department of Electrical and Computer Engineering (ECE), North South University (NSU)

Responsibilities:

- Support laboratory operations for Circuit Lab and Digital Logic Design Lab.
- Assist students during practical sessions, experiments, and technical troubleshooting.
- Maintain laboratory equipment, documentation, and operational workflow.
- Coordinate laboratory scheduling, experiment setup, and safety procedures.
- Assist faculty members in academic and laboratory-related activities.

Research Assistant (Part-Time)

May 2023 – February 2024

Department of Electrical and Computer Engineering (ECE), North South University

Research Areas: Microwave Engineering, 5G Antenna Design, Electromagnetic Wave

Propagation, Wireless Body Area Networks (WBAN)

Responsibilities:

- Assisted simulation and analysis of 5G textile antennas using CST Studio Suite.
- Supported antenna optimization and performance evaluation for research publications.
- Conducted technical documentation, data analysis, and result interpretation.
- Collaborated with faculty researchers and project teams.

Professional Training

PLC & HMI Training for Industrial Automation, Pilot Plant and Process Development Center (PP & PDC), Bangladesh Council of Scientific and Industrial Research (BCSIR) |August 2025 – November 2025 |

- Trained in industrial automation, PLC programming, HMI configuration, electrical control circuits, motor control systems, industrial communication, and automation system interfacing.
- Hands-on experience with contactors, relays, VFDs, sensors, switchgear, induction motors, servo motors, and practical PLC-HMI industrial projects.

Education

Bachelor of Science

January 2018 November 2023

Electrical and Electronics Engineering (EEE)

Department of Electrical and Computer Engineering (ECE)

North South University, Dhaka Bangladesh

CGPA – 3.23 (86%) on the scale of 4.00

Higher Secondary School Certificate (HSC)

July 2015 – April 2017

Science

Govt. Shah Sultan College, Bogura Bangladesh

GPA- 4.83 on the scale of 5.00

Secondary School Certificate (SSC)

January 2008 – April 2015

Science

Bogura Zilla School, Bogura Bangladesh

GPA – 5.00 on the scale of 5.00

Technical Profile

Engineering & Automation

PLC Programming, Human Machine Interface (HMI), Industrial Automation, Siemens PLC Systems, TIA Portal, Allen-Bradley PLC Systems, Wecon Technology, Electrical Control Circuits, VFD and Motor Control Systems

Programming & Data Analysis

Python, MATLAB, Basic C Programming, Machine Learning, Data Analysis

Simulation & Engineering Tools

CST Studio Suite, LaTeX

Office & Productivity Tools

Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Google Docs, Google Drive

Laboratory & Technical Operations

Circuit Laboratory Operations, Digital Logic Design Laboratory, Technical Troubleshooting, Laboratory Equipment Handling, Experiment Coordination, Technical Documentation

Professional Skills

Team Collaboration, Project Coordination, Leadership, Operational Support, Professional Work Ethics, Public Speaking, Adaptability

Publications

1. Design and Analysis of a Compact 28 GHz Textile-Based Antenna for Wireless Body Area Network. (ieeexplore.ieee.org/document/10427772)
2. 28 GHz Lock and Key Shaped Flexible Textile Antenna Design for Wearable Wireless Communications. (ieeexplore.ieee.org/document/10962792)
3. Development of a 28 GHz 5G Wideband Novel Compact Antenna for Wireless Body-Centric Network in Medical Applications. (ieeexplore.ieee.org/document/10303479)
4. Dual Band G-Slot 5G Antenna for Wireless Body Area Network. (ieeexplore.ieee.org/document/10441329)
5. Design and Analysis of 39GHz 5G Array Antennas for WBAN Applications. (ieeexplore.ieee.org/abstract/document/11103629)

Language Proficiency

- **Bangla** (Bilingual Proficiency)
- **English** (Full Professional Proficiency) (IELTS Score 6.5 British Council)
